

# Release Notes

Version 15.0.0.8168

Released May 17, 2022

## Enhancements and Changes

ProNest LT 15.0 contains many new features and enhancements, which are detailed in the [What's New](#). Several other enhancements and changes are available in this version:

### Metric CAD files

Example training CAD files are available for metric installs. (FB57517)

### Start menu folder

In the Windows Start menu, the Hypertherm CAM folder now includes a version year modifier. ProNest 2023 LT applications (ProNest LT, Materials editor, and so forth) are located under a folder titled Hypertherm ProNest 2023 LT. (FB45362)

### Default Home tab

The default Home tab now includes buttons for Settings and Change Materials. (PN18862)

## Supported Languages

The following languages are supported in this release:

### Fully translated

- Turkish
- Chinese (Simplified)
- French
- Portuguese
- Spanish
- Korean
- German

### Partially translated (All user interface elements, reports, and the Quick Start Guide PDF)

- Chinese (Traditional)
- Hungarian
- Italian
- Finnish
- Dutch
- Polish
- Czech

## Bug Fixes

The following bugs have been fixed in this release:

### Advanced Edit

- Selecting many profiles (300 or more) on a part in Advanced Edit causes an Access Violation error. (FB51086)
- Loop style reverts back to the original style when attempting to change it in Default Loops Settings in Advanced Edit. (FB57589)

### Localization

- Start, End, and Center point coordinates in Advanced Edit use decimal separators when running in a locale that should use comma separators. (FB56964, FB55728)

### Miscellaneous

- Duplicate commands can be added to the Quick Access Toolbar, and some commands may be ineffective. (FB56904)
- Undo and redo buttons are duplicated in the Quick Access Toolbar. (FB54783)
- In the Part List grid of the Edit Part List, sorting by Name is case-sensitive. (FB54960)
